

PRASHANT GAUTAM

gtm.prashant2@gmail.com • +977-9865442326 • [linkedin.com/prashant](https://www.linkedin.com/prashant) • prashant-gautam.com.np

Licensed Civil Engineer and Pulchowk Campus alumnus with comprehensive expertise in structural modeling, site supervision, post-disaster forensic investigations, and non-destructive material testing (NDT/SDT). Demonstrates a proven track record of synthesizing empirical field diagnostic data with structural theory, managing quality assurance on construction sites, and executing precise engineering documentation (DPRs, BOQs, rate analysis) in full compliance with National Building Codes (NBC) and IS standards. Possesses strong leadership, organizational, and technical communication skills across multi-stakeholder infrastructure and consulting projects.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Structural and Spatial Software:**

ETABS (Dynamic & Seismic Analysis), AutoCAD, SW-DTM, ArcGIS, Advanced MS Excel.

- **Engineering and Code Standards:**

Seismic Design (IS 1893:2016, IS 13920), Structural Diagnostics, Bar Bending Schedules (BBS), NBC Compliance.

- **Surveying and Instruments:**

Total Station, Auto Level, Theodolite, Compass Surveying

- **Field Diagnostics and NDT:**

Ultrasonic Pulse Velocity (UPV), Rebound Hammer, Carbonation Depth Analysis, Concrete Core Cutting.

- **Project & Cost Management:**

Quantity Estimation, Bill of Materials (BOQ), Rate Analysis, Daily Progress Reports (DPR), Vendor Coordination.

- **Leadership & Soft Skills:**

Technical Report Writing, Team Management, Remote Site Supervision, Stakeholder Communication.

PROFESSIONAL EXPERIENCE

Dibyashwori Nirman Sewa, Banepa, Kavre
Civil Engineer

June 2025 - Present

- **Standardizing Quality:** Stayed on top of daily site activities to make sure everything built was actually in line with the structural drawings and NBC codes.
- **Routine Inspections:** Took the lead on checking reinforcement (BBS) and formwork stability before every pour, while monitoring concrete workability through regular slump tests.
- **Project Coordination:** Acted as the link between project managers, contractors, and vendors to ensure timely materials arrival and smooth site workflow.
- **Record Keeping:** Handled day-to-day paperwork, including Daily Progress Reports (DPR) and site measurement books to ensure project transparency.
- **Measurement & Billing:** Performed on-site quantity take-offs to provide the actual measurements needed for accurate billing and payment claims.

Institute of Engineering Consultancy Services, Pulchowk, Lalitpur
Civil Engineer

Oct 2025 – July 2026

- **Post-Fire Forensic Investigation:** Contributed to Post-fire Detailed Damage Assessments (DDA) due to GEN-Z moment for 44 administrative and residential structures of federal government in Kathmandu and Pokhara to evaluate fire-induced structural compromise and community safety.
- **Material Testing (SDT & NDT):** Executed Concrete Core Cutting, Carbonation Depth Analysis, and NDTs (Rebound Hammer, UPV) to determine residual material strength and durability.
- **Estimation & BOQ:** Developed comprehensive Cost Estimates and Bill of Materials (BOQ) for rehabilitation works based on Government of Nepal norms and current district rates.
- **Reporting:** Correlated field data with structural observations to assist in drafting forensic reports determining 'Repair vs. Demolition' outcomes.

- **Independent Site Support:** Assumed site responsibility in an independent capacity, handling layouts and surveys directly from blueprints to ensure accurate positioning.
- **Quality Checks & Estimation:** Managed reinforcement inspections (BBS) and quantity take-offs independently, ensuring material requirements were tracked against the budget.
- **Documentation:** Took responsibility for maintaining site diaries and progress logs, providing a clear record of daily activities in the absence of a senior engineer.

CORE ACADEMIC & DESIGN PROJECTS

Seismic Resistant Design of Multi-Storied RCC Commercial Building

2024 - 2025

- Performed structural modeling and dynamic analysis of a B+G+9 storey building using **ETABS** to ensure seismic resilience.
- Designed structural members (Beams, Columns, Footings) in compliance with **IS 1893:2016** and **IS 13920** (Ductile Detailing) to optimize performance under earthquake loads.
- Conducted **Equivalent Static** and **Response Spectrum Analysis** to verify drift limits and structural stability as per the Nepal National Building Code (**NBC**).

EDUCATION

Bachelor's in Civil Engineering

2025

Pulchowk Campus, Institute of Engineering (IOE), Tribhuvan University (T.U)

Awarded with regular program scholarship provided by Institute of Engineering (IOE).

+2 Science

2021

Ambition Academy Secondary School

Awarded with full scholarship provided by Kathmandu Metropolitan City.

CERTIFICATIONS

Road Slope Stability and Bio-Engineering

ADB Sponsored Technical Capacity Building Program (RCIP - AF TA - 10113 NEP)

- Nature Based Bio-engineering techniques and Slope Stabilization

Disaster Management Training (3-days)

Armed Police Force (APF) Nepal

- Focused on emergency structural response, search and rescue protocols, disaster vulnerability assessments, and community risk reduction strategies.

LEADERSHIP & EXTRACURRICULAR

- **Exhibition & Health Camp Coordinator:** Led student organizing committee as primary coordinator to plan, fundraise, and execute campus-wide health camp sponsored by CESS-Nepal; served as core technical coordinator for 'AADHAR-2081', premier Civil Engineering Exhibition at Pulchowk Campus.
- **Editorial Board Coordinator & Editor:** Managed peer reviews, technical editing, and publishing workflows as coordinator and editor for 'The Bridge' Magazine published by CESS-Nepal.
- **Academic & Project Leadership:** Served as elected Academic Class Representative and project group Team Leader across multiple terms at Pulchowk Campus.
